Breed		Sex	Female
Sire name	Warawee Versacee	Dam name	Party Rose (481026)
Sample received	09/11/16		
Analysis started	15/11/16		
Report generated	17/11/16		

DISCLAIMER: Many genetic tests rely on knowledge of DNA sequence variants present in the horse and pony population. If a novel sequence variant is present in this horse or pony, it is possible for test results not to reflect the true status of this animal.

In instances where a client believes that this has occurred with their horse or pony, Practical Horse Genetics welcomes the chance to carry out further analyses and, where possible, use knowledge of the new sequence variant to improve our testing processes.
